

TM SERIES: TANK MOUNTED PIPE SUPPORTS

The Challenge

Try hard, but you won't find a *great* pipe support for polyethylene tanks ... until now. Our TM Series overcomes the typical challenge of how to securely mount the support to provide an easily installed, easily maintained and leak-free design that allows for expansion and contraction without imposing undo stress at the point of attachment.

The Solution

The key to the unmatched performance of our support is the method of attachment to the tank; our **Core-Bolt* assembly. Our support can be used for conduit, fill lines, overflows, and sight glasses. Access, disassembly, maintenance, and changeout are easy and quick with the TM Series supports.

Union Mount for Easy Installation and Maintenance

Snap-On Saddles up to 2"

3" to 8" with SS Clamps

Heavy Duty Clamp-On Saddles Up to 8"

2" Snap-On Fill Line Supports

1" Snap-On Sight Glass Supports

*Core-Bolt attachment hardware is available in 316LSS, Titanium, and C276 (Hastelloy) ... Standard gaskets are EPDM and Viton
